-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over TERMIN et al. (5,071,407 in view of LIPRIE (5,556,389).

TERMIN (Figs. 3-4) discloses a self-expanding filter/fixation device 22 to be received in deployment sheath 32 (col. 2, lines 50-56; col. 4, lines 47-55). TERMIN does not disclose a balloon catheter to use with TERMIN device. However, using a balloon catheter to follow a guidewire to a stenosis site in an angioplasty procedure is well known. For example, LIPRIE discloses a balloon catheter 12 with balloon 18 (Fig. 1-3) and a guidewire 16 and a method to treat a stenosis in which the balloon catheter 12 is guide by guiewire 16 so that balloon 18 is placed at stenosis 30 and expands to treat stenosis/occlusion 30. It would have been obvious to one of ordinary skill in the art at the time of the invention to use TERMIN device to deploy a filter 22 distally of the stenosis site before guiding catheter 12 over TERMIN guidewire 16 to place LIPRIE balloon 18 to the stenosis site to treat the stenosis so as filter 22 can trap particles/pieces of broken stenosis flowing downstream. Notice that Nitinol is a well known shape memory material in the art at the time of the invention.
